Letter of Recommendation

To Whom It May Concern:

This is to certify that **Lena Abdulrazak** has successfully developed the **Customer Complaint Management System**, which has been adopted within **Petrolube's Innovation and Transformation Department**. The system now supports Petrolube's operations by centralizing complaint handling, improving process efficiency, and ensuring automated management of complaint submission, tracking, investigation, and resolution.

During the internship, **Lena** demonstrated strong ownership, professionalism, and problem-solving ability in several critical areas:

- **Stakeholder Engagement and Requirements Analysis:** She collaborated with Operations, QA, Sales, and Customer Service stakeholders to gather requirements and map complex manual complaint processes into structured digital workflows. Her effective communication ensured alignment between business needs and technical implementation.
- **Technical Implementation and Design:** She translated business rules and SLA requirements into robust Power Platform solutions, implementing role-based portals, automated workflows, and Power BI dashboards for real-time complaint analytics and SLA monitoring.
- **Project Management and Collaboration:** She ensured timely delivery of system modules, coordinated with cross-functional teams, and proactively addressed technical risks. Her contribution led to the successful deployment of a production-ready system that is now embedded into Petrolube's complaint management operations.

The Customer Complaint Management System reduced errors, accelerated resolution, strengthened SLA compliance, and improved transparency, delivering lasting value to Petrolube's digital transformation.
